

A GUIDE TO ANCHOR'S HOME COOLING OPTIONS

If your existing cooling system is nearing the end of its life or your cooling costs are through the roof, now's a good time to upgrade to a new, energy efficient system.

As Trane Comfort Specialists, Anchor offers a wide selection of best in class cooling system options from Trane.

AIR CONDITIONER

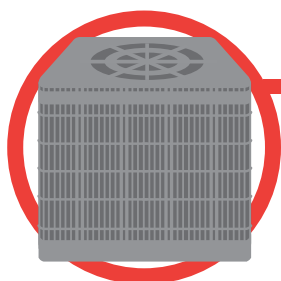

Air conditioners from Trane have ratings up to 22 SEER, making them some of the most energy efficient on the market. This helps you stay cool for less. Of course, you'll need to pair your AC unit with a furnace to stay comfortable in winter.

LIFESPAN 

~15 YEARS

HEAT PUMP

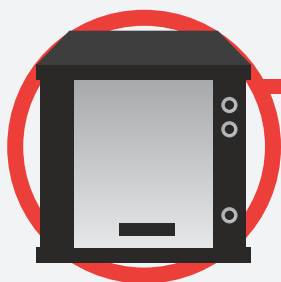

Heat pumps from Trane offer both cooling and heating, and they run on electricity rather than oil or gas. They are extremely efficient because of how they move heat from one place to another — making them a great year-round HVAC solution.

~15 YEARS

GEOHERMAL HEAT PUMP

A geothermal heat pump is a lot like a traditional heat pump — only it deals with the steady heat that's underneath the Earth's surface. This is the most energy efficient cooling and heating option available, but it has a more involved installation process.
